

Oracle Strategic Workforce Planning

Oracle Strategic Workforce Planning aligns your people strategy with your business strategy, to optimize your workforce for today, and prepare your organization for the workforce of tomorrow.

THE STATE OF WORKFORCE PLANNING TODAY

Today's leaders are under more pressure than ever to make decisions on what strategies they should pursue to achieve their strategic objectives. Whether it's entering a new market, launching a new product, or the decision to merge or divest part of their organization; leaders also need to understand the people, the skills, and the competencies needed to achieve their organizational goals.

Yet, less than 40% of organizations have any kind of proactive workforce planning process¹, meaning that the required people, skills and competencies are an after-thought, after operational costs have already been determined via a spreadsheet. Traditional planning has been finance intensive and effective for managing short-term operational costs, but often lacks insights into how their people will actually go about executing the strategy.

PREPARING YOUR WORKFORCE FOR TOMORROW

To close the gap between organizational strategy and people strategy, business leaders need buy-in from stakeholders across organization – line managers, finance, and HR on what the organizational objectives actually are. Only after leaders are aligned, can they can determine the drivers, or what the workforce demands will be. These drivers can be modeled against the current skills and competencies of your current workforce today, or what is known as workforce supply. Leaders need the ability to forecast the right balance between workforce supply and demand to make sure they have the right number of employees with the right skills, at the right time.

For example, a European bank that is looking to expand their international presence and open 20 new branches globally in the next 2-3 years. With demand planning we're able to determine what headcount is needed at what cost to expand internationally to these locations. From a supply planning perspective –business leaders can forecast risks in attrition and retirement and determine what skills and competencies are needed in designing these new roles and at what cost. Aligning the supply and
